

**FUTURE
SURE**

futuresure.co.nz

If you like today's gas, you'll love tomorrow's. New renewable energy, low and zero carbon gases are the future. With hydrogen gas and biogas already being developed and trialled here in New Zealand and globally, you can continue to enjoy the benefits of gas in your life as we move to tomorrow's gas energy.

The future is looking bright. And warm. And nicely cooked.

As an energy for homes and businesses, gas has many advantages and benefits. From cooking, to keeping us warm and heating our water. It's also used to produce electricity when there is not enough renewable electricity to meet demand.

Gas is a high performance energy, now and into the future.

> The future looks bright with renewable gases.

Gas is here to stay!

The many benefits of gas:

Water heating with gas

- Gas water heating is reliable.
- Instant and limitless hot water.
- Highly cost-effective with no wasted energy.

Home heating with gas

- A great way to keep warm and cosy.
- Heating with gas means you'll always be warm.
- Heating with gas is quick and energy efficient.

Cooking with gas

- Take your cooking to the next level.
- Immediate, responsive with even heat distribution.
- Precise temperature control.
